NAME: James Bogden

Industry and Professional Development

2.3 Outline the potential progression routes into the film industry and wider sector

What have you learned about potential progression routes into film and connected creative industries? (For example about studying at university, apprenticeships, online opportunities, entry-level work, film festivals and networking etc)	You could study at university and get a well payed job working on a film or something like a camera operator or ~~light~~ sound engineer. These are reliable and well payed.
What do you plan to do when the Academy is finished?	I plan to continue writing and creating short films with my friends which I am really passionate about.
